INFORMED CONSENT AGREEMENT

PATIENT NAME: _____

To the patient: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if there is anything that is unclear.

The nature of the chiropractic adjustment-

The primary treatment used by doctors of chiropractic is spinal manipulative therapy. The procedure is the one that will be used to treat you. The doctor's hands or a mechanical instrument may be used upon your body as a way to move your joints. That may cause and audible "pop" or "click," much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.

Analysis/Examination/Treatment

As a part of the analysis, examination, and treatment, you are consenting to the following procedures (please initial those you are consenting to):

___ spinal manipulative therapy ___ palpation ___ range of motion testing

___ vital signs ___ orthopedic testing ___ basic neurological testing

___ muscle strength testing ___ postural analysis testing ___ EMS

___ hot/cold therapy ___ radiographic studies

The risks inherent in the chiropractic adjustment-

As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulation of the neck have been associated with injuries to the arteries of the neck leading to or contributing to serious complications including stroke. Some patients will feel stiffness and soreness following the first few days of treatment. The Doctor will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to the Doctor's attention it is your responsibility to inform the Doctor.

The probability of those risks occurring-

Fractures are rare occurrences and generally result from some underlying weakness of the bone which we check for during the taking of your history and during examination and X-Ray. Stroke and/or arterial dissection caused by chiropractic manipulation of the neck has been the subject of ongoing medical research and debate. The most current research on the topic is inconclusive as to a specific incident of this complication occurring. If there is a causal relationship at all, it is extremely rare and remote. Unfortunately, there is no recognized screening procedure to identify patients with neck pain who are at risk of arterial stroke.

The availability and nature of other treatment options-

Other treatment options for your condition may include:

Self-administered, over-the-counter analgesics and rest

Medical care and prescription drugs such as anti-inflammatories, muscle relaxants, and pain-killers.

Hospitalization

Surgery

If you choose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such option and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated-

Remaining untreated may allow the formation of adhesions and reduce the mobility which may set up a pain reaction further reducing mobility. Over time, this process may complicate treatment making it more difficult and less effective the longer it is postponed.

CONSENT TO TREATMENT (MINOR)

I hereby request and authorize Dr. Waltemate to perform diagnostic tests and render chiropractic adjustments and other treatments to my minor son/daughter _____. This authorization also extends to all other doctors and office staff members and is intended to include radiographic examination at the doctor's discretion.

As of this date, I have the legal right to select and authorize health care services for the minor child named above (if applicable.) Under the terms and conditions for my divorce, separation, or other legal authorization, the consent of a spouse/former spouse, or other parent is not required. If my authority to so select and authorize this care should be revoked or modified in any way, I will immediately notify this office.

**DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE.
PLEASE CHECK THE APPROPRIATE BLOCK AND SIGN BELOW.**

I have read or have had read to me the above explanation of the chiropractic adjustment and related treatment. I have discussed it with Dr. Waltemate and have had my questions answered to my satisfaction. By signing below, I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
